Part 1:

DESCRIPTION OF THE COMPETENCY FRAMEWORK FOR THE HOMELESS SECTOR

PART 1: DESCRIPTION OF THE COMPETENCY FRAMEWORK FOR THE HOMELESS SECTOR

SECTION 1: THE CONTEXT

1.1 Introduction

The Homeless Agency's Learning and Performance (L&P) Network recommended the development of Competency Framework as part of their Strategy for 2005 -2006. It was felt that such a Framework would aid organisations in their selection, support and performance management process. The L&P Strategy stated that a Competency Framework was critical to developing a quality workforce which could meet the needs of homeless people.

Adare HRM was awarded the contract to develop this Framework for the homeless sector and they commenced work on this project in July 2005. Their objective was to create a 'clear menu of competencies' that organisations could use. The project was divided into three stages:

1. **Research and preparation**: this involved gathering data on existing competency frameworks being used in the sector (e.g. TOPSS and Danos) and the facilitation of workshops with a cross section of employees and managers
2. **Design**: this involved analysing the output from the workshops and combining it with knowledge of other frameworks to create a competency framework for the sector. This is detailed below
3. **Communication**: this involved receiving feedback from the Steering group and a cross section of employees and then signing off on the framework. The framework will then be communicated to the sector

1.2 Guiding Principles

We adhered to the following principles whilst researching and developing the framework:

- To ensure the framework is clear and accessible with a logical structure
- To ensure it provides a comprehensive menu of competencies
- The framework must be relevant to all people who will be affected by the framework
- The behaviours it outlines for each competency must be necessary and appropriate
- The framework should broadly capture the essence of the values of the sector, i.e. have a 'humanistic' dimension
- Its structure should permit, at a later date, a possible linkage to a qualification system such as FETAC or NVQ

SECTION 2: DEFINITIONS

Competency Frameworks can mean different things to different organisations. The Framework which has been designed by Adare HRM is based on the following understanding of the key terms:

2.1 Competency

There are a number of definitions of competencies, however most definitions are variations on two well-established themes:

- Competencies as descriptions of work task, i.e. what a person has to do in a job
- Competencies of behaviour, i.e. how a person does their job

The latter theme is the foundation for the creation of the Competency Framework for this sector and thus the definition which is appropriate to the framework is:

‘Competencies are critical behaviours that individuals demonstrate when undertaking job-relevant tasks effectively within a given organisational context or sector.’

2.2 Competency Cluster

A competency cluster is a collection of closely related competencies; usually three to five per cluster.

2.3 Definition of a Competency Framework

A competency framework is the term given to the complete collection of clusters, competencies and behaviours. It is a structure that holds and organises the descriptions of behaviours that apply at all levels for all job functions. It is the vehicle through which the organisation can communicate exactly what behaviours are required for

- the success of each role
- successful delivery of service/support to the user/client
- and for the success of the organisation itself (i.e. achieving its mission)

2.4 Glossary of Terms

The following terms are used throughout the framework and are defined as:

The individual: The actual people requiring the service you provide.

Key people: Are those people who are key to an individual’s health and social well being. They include family, friends, carers and others with whom the individual has a supportive relationship.

Others: Are those other people within and outside your organisation who are necessary in order for you to fulfil your job role.

Stakeholders: All those who have a stake or an interest in your organisation and are thus affected by your work.

SECTION 3: STRUCTURE OF THE COMPETENCY FRAMEWORK FOR THE HOMELESS SECTOR

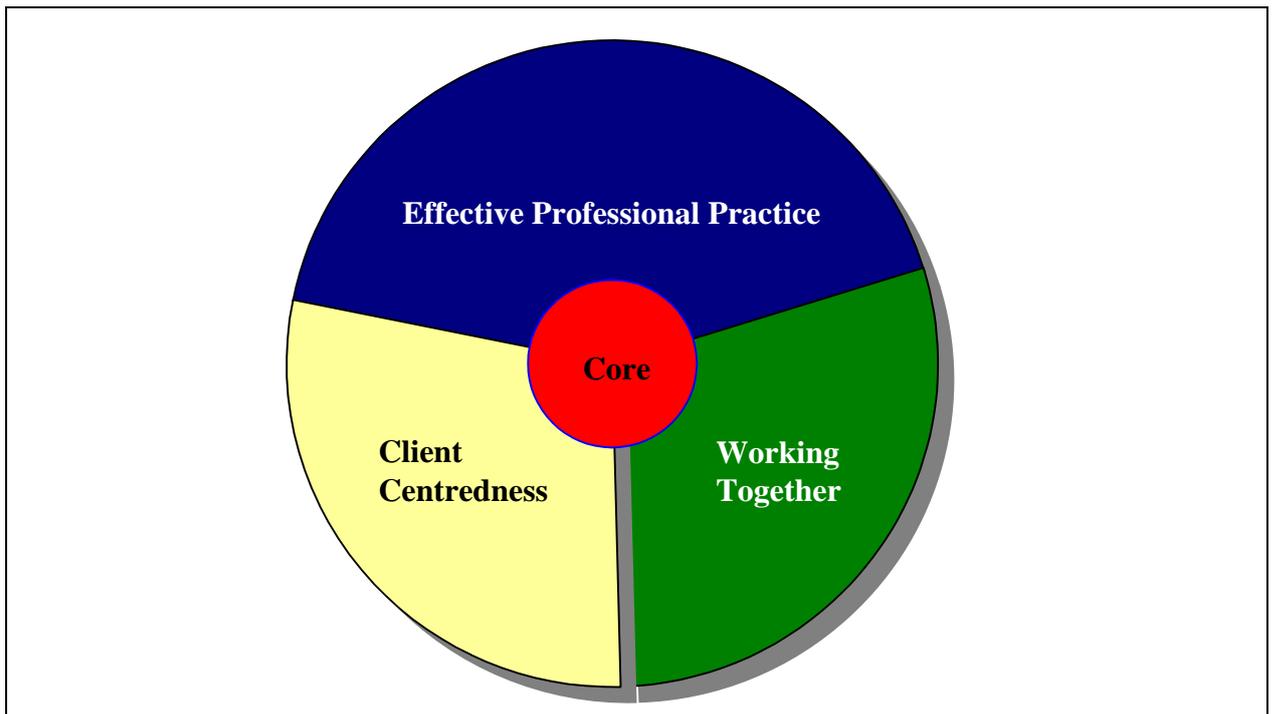

3.1 Core and Role Specific

The framework comprises two key areas: core and role specific competencies. Core competencies refer to those behaviours that are essential for everyone working in the sector. Some of these competencies may reflect the values or principles of organisations. Based on research and output from the workshops the recommended core competencies are:

1. Commitment to providing the highest levels of quality service
2. Respect for others
3. Openness to change
4. Practice and professional development
5. Communication
 - a. Oral & aural
 - b. Written
6. Commitment to health & safety

The proposed framework recommends fifteen role specific competencies. These are behaviours that are essential for specific roles or groups of roles. They are organised into three clusters. These are illustrated in Figure 1.

Figure 1: Competency Framework

3.2 Clusters:

Figure 1 shows the three clusters, which along with the core competencies comprise the framework. These three clusters are recommended as they broadly capture the essence of each employee's role, regardless of length of service, seniority or organisation. The actual competencies comprising the clusters are role specific and thus may not apply to everyone. In other words the three clusters will be relevant to each role; however some competencies belonging to a particular cluster may not be relevant to that role.

Cluster 2: Client Centredness:

This cluster captures those competencies and behaviours that are required to provide a quality service to the individual. Areas such as health and safety, care planning and managing challenging behaviour are covered and the underpinning principles are respecting the individual and helping them to become independent. The specific competencies in this cluster are:

1. Promoting choice, independence, health and well being
2. Contributing to care planning and review for individuals
3. Focusing on outcomes
4. Contributing to the prevention and management of challenging behaviour
5. Contributing to the protection of individuals
6. Advocacy

Cluster 3: Effective Professional Practice:

This cluster refers to your own practice and the skills that are required to continuously improve and be professional. The cluster competencies are:

1. Professionalism
2. Planning and organising
3. Analysis & problem solving
4. Initiative and taking responsibility

Cluster 4: Working Together

This cluster organises the competencies relating to your day to day interactions. They outline behaviours relating to building and maintaining relationships between self and team members, between self and subordinates and between self and other external agencies. Many of the competencies outlined in this cluster are also important for working with individuals (e.g. negotiating on their behalf etc). Your attitude and influencing styles are also covered here as they are key to your ability to interact effectively. The competencies in this cluster are therefore:

1. Leadership
2. Influencing and negotiating
3. Resilience and positive outlook
4. Effective team working
5. Developing external relationships

3.3 Behaviours

Each competency is a collection of related behavioural indicators. These are examples of the positive behaviours from our definition of competencies that would be observed when you demonstrate a competency. It is not necessary, or indeed possible, to provide examples of all the behaviours that could be observed within a competency. The behaviours that are included normally indicate the type of behaviour that is expected to be observed.

3.4 Behavioural Levels:

The behavioural indicators within each competency are divided into separate levels to reflect the different degrees of requirement

- **Foundation level:** this is like the threshold level, i.e. the basic level required to do the job. For some roles these represent the behaviours required on entry and for others these behaviours will need to be demonstrated by the role holder within a defined period (such as six or twelve months).

- **Level 1:** describes the same competencies and behaviours but at a more advanced level. Therefore these are relevant to an employee who is proficient in many aspects of their role. For many of the competencies, level 1 behaviours will be required once an employee has greater than one years service.
- **Level 2:** requires a level of expertise that is associated with being in the role for some time and/or operating at a more senior level. For many of the competencies at this level, the employee would have a certain level of decision-making autonomy and is likely to manage staff or mentor staff.

It is important to note that different roles will comprise a hybrid of competencies and the level of behaviours required may differ. For example; you may be required to demonstrate a commitment to health and safety at level two and leadership at level one. It is also important to note that if you are required to demonstrate behaviours at level 1, for example, you are also expected to demonstrate the behaviours outlined at the foundation level for that competency, i.e. each level builds on the behaviours of the previous level.
